

# Priscolith® 851

The Priscolith 851 is the blanket of choice on duplicator and larger format presses where a blanket gauge of .101" is recommended. The PriscoLith 851 offers a ground and buffed surface. This blanket is extremely durable and is capable of accepting and transferring an exceptional amount of ink, making it an excellent choice for groundwood, newsprint and other absorbent stocks.

## Physical Characteristics:

- |                          |                      |
|--------------------------|----------------------|
| • Color:                 | Green                |
| • Buffed Surface:        | 5 Ply .101 +/-0.0008 |
| • Elongation @ 22.5 kgf: | 5 Ply 1.4%           |
