

## Product Bulletin

# PRISCO® CRYSTAL CLEAN GEL™

**Product Description:** PRISCO Crystal Clean Gel is a user friendly product for removal of calcium carbonate as well as other salt build-ups and glazes on press rollers. This mildly-acidic product will keep rollers cleaner, prevent roller stripping and promote more consistent color when used regularly. The product may be substituted for PRISCO Alkaline Paper Roller Rinse in any roller maintenance regimen. Crystal Clean Gel is non-corrosive to press components, easy to apply and will resist dripping or flying-off from rollers.

PRISCO Crystal Clean Gel is intended for deep cleaning when there is a visible calcium build-up as a part of a three-step roller maintenance program or as a stand-alone product if desired.

### Advantages:

- Prevents calcium salt build-up and roller glazing with regular use
- Easy to apply gel reduces fly-off or dripping from rollers
- Translucent Color - Easy to see amount applied and where
- No offensive odor
- Far more effective than vinegar
- Non-Corrosive
- Low environmental impact - 0 VOC
- Lower health risk than competitive products

**Directions:** To use PRISCO Crystal Clean Gel, first remove ink from the rollers using a PRISCO blanket and roller wash (a non water-miscible wash is preferred). Disengage the wash-up blade and apply PRISCO Crystal Clean Gel to the rollers. Let the solution run-in for 3-5 minutes at wash-up speed. If necessary a small additional amount may be applied to prevent the rollers from drying out. Engage the wash-up blade and rinse rollers with warm water. With the wash-up blade still engaged rinse rollers with blanket and roller wash.

**Product Code:** HF55
