

# PRISCOLITH *hybrid*

Every once in a while a product comes along that sets itself apart from the competition. By talking and listening to people in the packaging industry, Printec has developed the HYBRID. Until now, packaging printers had to make a choice between durability and print quality, as no blanket has been able to provide both. The HYBRID is the result of extensive research and development. By combining an ultra-stable carcass with a unique, thicker compressible layer and precisely ground and buffed top surface, Printec has succeeded in developing a blanket that encompasses the best of both worlds. Field trials have shown that the HYBRID is exceptionally durable, resisting smashes and edge cutting while providing excellent release and print quality. As an added bonus, the HYBRID is compatible with both conventional and hybrid inks.

#### Features:

- Precisely ground and buffed quick release surface
- Unique, thicker compressible layer
- Conventional and Hybrid ink compatible
- Reduced piling and linting
- Uniform gauge
- Compressible construction
- Washes easily
- Defect-free surface

#### Benefits:

- Ground and buffed quick release surface enhances ink transfer, with minimal dot gain and dense solids
- Unique, thicker compressible layer provides stability, reduced smashes and less edge cutting, resulting in reduced blanket usage
- Dual compatibility reduces blanket changing downtime and blanket inventories
- Reduced piling and linting means less downtime for blanket washing
- Uniform gauge assures excellent printing consistency
- Compressible construction assures longer blanket life
- Smooth surface provides faster wash-ups
- Defect-free surface means increased production time

#### Durability:

- High tensile strength backing prevents stretching
- Longer life
- Resists smashes and sinking
- Excellent resistance to solvents

#### Physical Characteristics:

- Color: Dark Blue
- Buffed Surface: 3 Ply .067 +/-0.0008  
4 Ply .077 +/-0.0008
- Elongation @ 22.5 kgf: 3 Ply 2.0%  
4 Ply 2.0%
- Hardness: 78 Shore A
