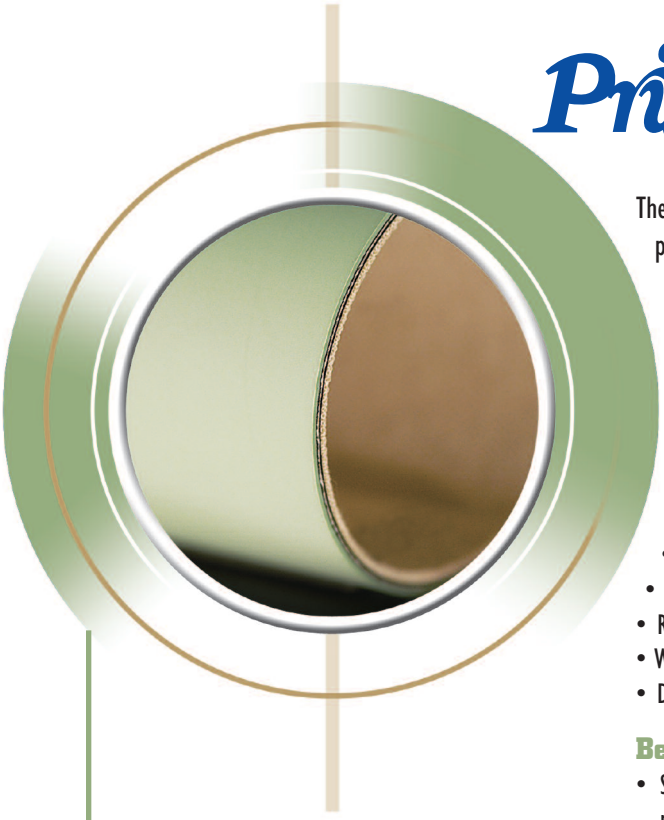
Priscolith® infinity



The PriscoLith INFINITY has been designed especially for use on high-speed heatset web presses. With a revolutionary new upper fabric layer and highly modified compressible layer, the INFINITY holds up to the stresses placed on web blankets while providing enhanced print quality. Significant advantages of the INFINITIY are it's proven ability to withstand sinking at the gap, superior ink transfer and the ability to successfully handle a wide variety of stocks.

Features:

- Smooth ground and buffed quick release surface
- Revolutionary upper fabric layer, highly modified compressible layer
- Superior ink transfer
- Ability to handle many stocks
- Reduced piling and linting
- Washes easily
- Defect-free and solvent-resistant surface

Benefits:

- Smooth ground and buffed quick release surface enhances ink transfer, provides minimal dot gain, prints dense solids and assures uniform gauge consistency
- Blanket flexibility assures easy mounting on narrow gap cylinders
- Modified compressible layer provides durability and smash resistance on a wide variety of stocks
- Smooth top surface reduces piling and linting, and ensures faster wash-ups
- Defect-free and solvent-resistant surface means increased production time and less blanket changing

Physical Characteristics:

• Color:	Lime Green or Dark Blue
• Buffed Surface:	3 Ply .067 +/-0.0008
	4 Ply .077 +/-0.0008
• Elongation @ 22.5 kgf:	3 Ply 1.7%
	4 Ply 1.6%
• Hardness:	78 Shore A
