HP Latex 330 Printer

Welcome to PriscoDigital

PriscoDigital is an exclusive national channel partner for RICOH, HP Scitex, HP Latex and Esko. We are the leading provider of commercial and industrial printing technologies for the commercial printing market. PriscoDigital focuses on the sales and finance of a digital enterprise, including digital production printers, large-format industrial printers and finishing solutions. Our unique offering includes additional services in G7 calibration, color management, applications and software training, elite wide format sales training and consumables.

The goal of this catalog is to showcase the most common items used in digital printing. We are partners with a variety of manufacturers and can provide many of the products that they offer.

Don't Settle for just Basic Training, Get Elite Training

Elite Customer Training

Installation • Workflow • Color Management

PriscoDigital Elite Installation & Training

PriscoDigital is proud to be recognized as an industry leader in providing the best in-class customer Installation and Training services to our customers. PriscoDigital's Elite Services number one goal is to make you and your staff 100% self sufficient in owning and operating your new solution, beginning before your new digital solution even arrives on site, and continues well after our team leaves your facility, so you can count on PriscoDigital to be there for you every step of the way.

PriscoDigital Elite Printer Training

Product Number	Reference	Details	Price
PDTRAIN	Elite HP Scitex/Latex Printing Training	Included with purchase of Printer. Training expands upon the basic items required by HP to cover all aspects of printer operation, maintenance, and printing production including real world applications aimed at helping new operators get their new printer producing quality prints immediately.	Varies by Printer
PDTRAIN-ADV	Advanced HP Scitex/Latex Printing Training	This course is normally scheduled 30 to 60 days after installation. It can cover many topics with the goal of giving operators a greater understanding of preparing files in prepress, file handling in the RIP, operation of the printer, and how to produce a quality final product. A young child with red hair, wearing a colorful patterned shirt and blue jeans, stands on a silver step ladder. The child is reaching up to draw a large white outline of a rocket ship on a grey concrete wall. The rocket has a pointed nose cone, a circular window, and a tail section. A small black dog is sitting on the ground to the left of the ladder, looking up at the child. The background is a plain grey wall.

Think bigger.

Ricoh knows how important it is for our customers to make the right decisions when it comes to future growth.

That's why we've invested in the latest technologies, strengthened our capabilities, forged new relationships and developed innovative new products and color management programs.

Our unique 360 approach lets you think bigger with the power and confidence of a trusted partner by your side, navigating the way through our rapidly evolving industry.

Take advantage of what Ricoh offers and together we can focus on what matters most – *your continued success.*

RICOH
imagine. change.

RICOH Pro C9100 / C9110 Series

The RICOH Pro C9100/C9110 Series is an affordable digital color production device with higher productivity, greater media handling capabilities, ease of use and best in class image quality. These attributes ultimately enable printers to expand business opportunities and better serve customers with quicker turnaround times and enhanced image quality. The RICOH Pro C9100/C9110 allows print and marketing service providers to produce high-value, high-quality prints.

Product Number	Product	Details	Price
C9100	RICOH Pro C9100	13" x 19.2" Paper Size, CMYK, 1200 x 4800 dpi, 110 ppm	Ask for Quote
C9110	RICOH Pro C9110	13" x 27" Paper Size, CMYK, 1200 x 4800 dpi, 130 ppm	Ask for Quote

RICOH Pro C7100 / C7110 Series

The RICOH Pro C7100/C7110 Series is ideal for small and mid-size commercial printers who are looking to offer more competitive applications to their customers without going over budget. With an added station available for either white or clear ink, these high-speed, production color printers and MFPs enable commercial printers to expand their application portfolio.

- Compete for jobs that involve clear or white toner.
- Start or expand a print on-demand service.
- Personalize or customize materials.
- Dazzle customers with 1200 x 4800 near-offset image quality.
- Print oversize pieces for signage, window clings and more.
- Let creativity rule with media that ranges from tree-based to synthetics to envelopes to heavily textured, up to 360 gsm.
- Expand offerings with inline finishing — booklet maker, punching, saddle stitch and more.

Esko Automation Engine

Automation Engine sets a new standard for prepress workflow automation. It is a new modular workflow server with dynamic workflows that are easy to set up and operate. Automation Engine ensures increased efficiency and throughput and saves time and money. It is, by all standards, an exceptional answer to the daily challenges of print professionals who need to increase quality, reduce errors and drive cost out of the process.

Automate Prepress Tasks

Automation Engine is Esko’s workflow server. It automates prepress tasks, which speeds up the process, but also reduces the error rate and the need for operator intervention.

Integrate Web and MIS

Automation Engine is an intelligent system that takes prepress production to a new level by integrating with business systems as well as web front ends.

Save Time and Money

Automation Engine ensures increased efficiency and throughput and saves time and money.

CALDERA

VERSION

Built for speed, reliability and flexibility, our solutions represent the cutting edge of wide-format production software, supporting all popular large-format print manufacturers.

Incorporating key features such as automatic nesting (both true shape and regular), advanced tiling, ICC color support and task automation, Caldera is a powerful tool for print operators looking to streamline their production across multiple devices, while simultaneously achieving consistent color output and saving ink and media on all their prints.

Our industry award winning solution for Print-and-Cut Workflow, **VisualRIP+** & **GrandRIP+** are the preferred choice of some of the most successful print shops around the world.

V10 harnesses the latest version of APPE and a wealth of new functions to create a suite that enables blistering throughput speeds and a hitherto unseen fluidity of control for operators, making it the RIP to beat for graphic arts professionals.

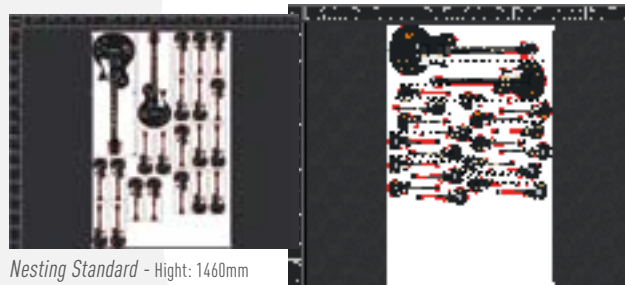

CUT WORKFLOW

Caldera's **Cut Workflow** drives the industry's best cutters, whether contour or XY devices.

- Ensures precision cutting for your Cut Workflow
- Manages multiple contours in one file
- Generates a machine-specific file for each individual job
- Automatically sets up cut marks for specific devices
- Guides the cutter along a document's embedded contours
- Optimize your media usage with Contour nesting

Optimize your media usage with **Contour Nesting**

Contour Nesting takes into account an image's true shape so the element can be optimally positioned to prevent excess wastage. Caldera now detects the exterior cut contour and uses it to optimize nesting.

Nesting Standard - Height: 1460mm

Contour Nesting - Height: 1000mm

QUALITY MONITORING

Check print file conformity to industry standards with **Print Standard Verifier G7**

Caldera's **Print Standard Verifier** is the solution to the ever-increasing requests for standards compliance in the digital printing market. Users can now add print process checking tools to their Caldera RIP or workflow suite, guaranteeing repeatable, standardized output whenever they print.

Caldera® VisualRIP+ Caldera® GrandRIP+

VisualRIP+ is the comprehensive workflow solution for large format print and print-to-cut production for use with multiple devices. The VisualRIP+ package includes 2 Large Format Print Drivers. Integrated features including Adobe PDF Print Engine, Tiling+, Nest-O-Matik which help save media, Step & Repeat, Hotfolders, SuperSpooler, SignMark and EasyMedia a powerful ICC color calibration engine.

GrandRIP+ is the ultimate production workflow solution for large-scale wide and super wide format print and print-to-cut applications. The VisualRIP+ package includes 2 Large Format Print Drivers and 2 Grand Format Print Drivers. Incorporating the key features of all Caldera's RIP packages, including Adobe PDF Print Engine, Nest-O-Matik™, Step & Repeat, SuperSpooler, Tiling+ and SignMark and EasyMedia a powerful ICC color calibration engine.

Caldera WebShop

WebShop is a full-featured solution that allows PSPs the freedom to tailor their online store to their individual needs and can be integrated with Caldera's Flow+ and RIP solutions to provide a complete sales-to-production system.

ONYX® Thrive™ ONYX® ProductionHouse ONYX® PosterShop

ONYX Thrive workflow software is a scalable print production solution based on Adobe® PDF Print Engine technology. ONYX Thrive is a true end-to-end PDF workflow from digital file submission through printing and cutting. The Thrive Production Manager browser-based user interface enables workflow control from anywhere, optimizing both operator and output device productivity. ONYX Thrive software manages the wide format print production workflow process offering print service providers accurate, predictable, high quality printing results, and reducing costly errors

ONYX ProductionHouse is wide format production RIP software that delivers high levels of automation, enhanced for superior output color and quality. Print service providers can achieve a streamlined print production process and reduce the time needed to prepare print jobs resulting in saleable prints faster. The ProductionHouse package includes support for 4 active printers.

ONYX PosterShop is wide format RIP software that enables shops to unify their print production process on more than one device and provides the tools to maintain consistent output quality. Print service providers will be able prepare jobs for print quickly and find it easy to automate repetitive tasks resulting in sellable prints faster. The PosterShop package includes support for 2 active printers.

GMG® ProductionSuite™

GMG® ColorServer™

GMG® SmartProfiler™

GMG® ColorProof™

GMG ProductionSuite is an all-in-one solution for automated, standardized and color consistent Wide-Format Production. ProductionSuite is currently the most complete production solution for wide-format printing. It can print jobs as they are being processed, driving more than 800 different printing, cutting and CtS-devices.

GMG ColorServer creates uniform color standards within seconds. No matter whether you are a print house or a prepress company: very often you get data in different color spaces from your customers, or data need to be prepared for a wide variety of printing processes. Especially checking and normalizing all kinds of PDF files is a very time-consuming process. GMG ColorServer reduces this effort to a minimum by providing fully automatic color conversions for all printing processes.

GMG SmartProfiler is a wizard for the calibration and profiling of different output devices, such as digital presses or large format systems, without profound knowledge of color management. The profiling tool assists the creation of individual **GMG ColorServer** profiles.

GMG ColorProof provides a complete solution for easy and reliable proofing for the toughest quality demands! GMG ColorProof is the most professional software solution for producing digital, absolute color-accurate contract proofs. GMG ColorProof contains all the components needed for high-end proofing applications, including calibrations and color profiles. The printing result is accurately simulated on the basis of GMG's DeviceLink technology.

Keencut™ 65" SteelTraK

Developed specifically for the tougher and thicker rigid and semi-rigid substrates used in today's sign making market, the heavy-duty SteelTraK handles oversized materials with ease. With a cut length of 65" it is the longest, most accurate and easy-to-use manual vertical cutter available.

The SteelTraK can be positioned right next to your printing machines without fear of airborne dust. The rear spine of the SteelTraK is fitted with a counterbalance that allows users to put the head in any position without it dropping to the bottom of the machine. A robust frame that includes extruded aluminum back beams offers support for sheets of all sizes and prevents offcuts from falling through the frame.

Keencut 104" Evolution-E2

The Keencut Evolution-E2 is the industry's most precise wide-format cutter, engineered for speed and convenience. The weighted cutting bar provides additional grip for materials, eliminating the need to manually hold materials in place. A sturdy torsion bar allows single operators to lift and control the entire cutter bar from a single end.

Adjustable mounting brackets allow the Evolution-E2 to be affixed to any table. The adjustable levelers ensure straight and accurate cuts on any surface - to within .008" over the entire length of the cut.

Hiker H-307AS
Single Feed with
Manual Washer Feeder

Hiker H-308HN
Dual Feed,
Single Stroke

Hiker Automatic Grommeting Presses

The **Hiker H-307AS Single Feed Grommeting Press** is arguably the best value available in the grommeting market today. This press automatically feeds the self-piercing grommets while the operator manually feeds the washers. The H-307 is designed with a manual washer feeder which drops the washer on the lower die, effectively eliminating the need for an operator to put their fingers between the die. The **Hiker H-308HN Dual Feed Grommeting Press** is a reliable and economical dual feed grommeting machine. It works with Hiker's highest quality self-piercing grommets, which makes the machine less complicated, easier to maintain and more reliable. The H-308 also has one of the most trouble free feeding systems in the market today.
