

PRISCOLITH *ultra*

Calendared fabric layers and a highly modified compressible layer make the ULTRA an extremely durable printing blanket for the most challenging press conditions. The ULTRA was designed for use in large-format sheetfed and web press applications.

Features:

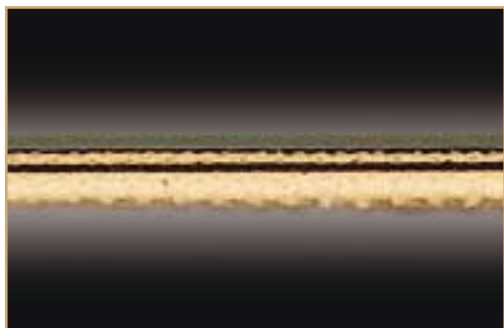

- Smooth ground and buffed quick release surface
- Calendared fabric layers
- Highly modified compressible layer
- Reduced piling and linting
- Washes easily
- Defect-free and solvent-resistant surface

Benefits:

- Smooth ground and buffed quick release surface enhances ink transfer, provides minimal dot gain, prints dense solids and assures uniform gauge consistency
- Calendared fabric provides reduced stretch and sinking on press
- Modified compressible layer enhances durability and smash resistance
- Smooth top surface reduces piling and linting, and ensures faster wash-ups
- Defect-free and solvent-resistant surface means increased production time and less blanket changing

Physical Characteristics:

- Color: Green
- Buffed Surface: 3 Ply .067 \pm 0.0008
4 Ply .077 \pm 0.0008
- Elongation @ 22.5 kgf: 3 Ply 1.6%
4 Ply 1.4%
- Hardness: 79 Shore A
