PRISCO® Webfount™ 225N and 325N Fountain Solution Concentrates

Product Description: PRISCO® Webfount™ 225N and 325N Fountain Solution Concentrates are one-step alcohol-eliminating solutions designed to provide value added benefits on heatset and coldset web offset presses with brush, spray and continuous dampening systems. These are low-VOC fountain solutions that have been formulated to increase press operating latitude with today's paper stocks and ink formulations. Printing plants will see significant measurable increases in productivity due to faster start-ups, faster makeready times and less paper waste. In addition, our customers have seen overall quality improvement in their runs after switching to Webfount formulas. All formulas have broad buffering capabilities making them suitable for all water conditions.

Series Advantages:

- High pH fountain solution to combat "Precipitated Calcium Carbonate"
- Highly buffered - works in low to high alkalinity water conditions
- Eliminates highlight dot loss
- Produces lower dot gain, sharper printing and the ability to decrease ink and water settings
- Minimizes paper piling - less down-time, longer runs between wash cycles and more productivity
- Prevents plate staining, tinting and toning
- Strong biocide package to effectively eliminate fungus growth - cleaner recirculators
