

# Priscolith® *b35sb, b37sb, b41sb*

The Priscolith B35SB, B37SB, B41SB series of adhesive-backed blankets sport both a new compressible layer as well as a new adhesive composition. Available in gauges of .035", .037" and .041" this blanket will not move on the cylinder during production, but is easily removed for replacement. The new compressible layer provides longer life and better print quality. These blankets are fabric backed and are directional. Unlike some competitive products, the Priscolith B35SB, B37SB, B41SB can be ordered in roll lengths.

## Physical Characteristics:

- |                          |                                     |
|--------------------------|-------------------------------------|
| • Color:                 | Blue                                |
| • Buffed Surface:        | 2-Ply .035", .037", .041" +/-0.0008 |
| • Elongation @ 22.5 kgf: | 1.6%                                |
| • Hardness:              | 86 Shore A                          |
