PRISCO® CALCIUM ELIMINATION KIT

Printers are finding that calcium levels have increased in their paper and in their water. When this calcium builds up on rollers, blankets, plates and in the dampening system of the press, the printer will experience:

- poor ink transfer
- roller stripping
- ink mottling
- hickies
- plate sensitivity, tinting, and toning
- plate blinding
- higher water speeds
- ink emulsification
- slow ink drying
- out-of-control conductivity and pH levels

At **PRINTERS' SERVICE**, we are committed to helping you optimize your performance. When you can reduce or eliminate calcium-related problems, you'll enjoy **improved quality and higher profits!**

That's why we've put together this special kit of problem-solving products. They're designed to work on your rollers, and in your dampening system, to remove calcium and many other compounds that hurt your press productivity.

Make them a part of your normal maintenance program.

Initial Cleaning	Daily Maintenance	Weekly Maintenance
Salt Crystal Remover for tough calcium and salt deposits on rollers	Chrome Roller Cleaner clean and desensitize dampening and chrome rollers	D-Glaze de-glaze and condition roller train
Royal Flush clean and disinfect the entire dampening system		Crystal Clean Gel de-calcify roller train, restore velvet-like surface texture
		Eezy-Klene deep clean and condition roller train

For your convenience, you'll find an MSDS for each product and a copy of our popular Tech Talk "Calcium and its Effect on Printing." Your sales rep and technical representative will be happy to review the features and benefits of these products and how benefit you and your pressroom. Simply follow the detailed product instructions and see how your performance improves.
