CONTI-AIR® KRYPTON

Print to perfection. With the UV blanket
for high-quality sheet-fed, web offset
and metal decorating.

Our printing blankets have a special CONTI-AIR® compressible
layer of closed microcells with over pressure.

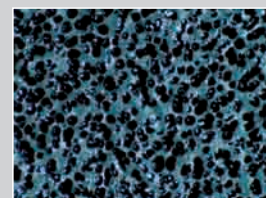

Print to
perfection.

CONTI-AIR® KRYPTON

- Advanced EPDM* based face compound technology provides high resistance to "image retention", resulting in fewer blanket changes and longer service life.
- Sharp and consistent dot transfer thru out long press runs and form changes.
- Print surface formulated to transfer aggressive plastic, foil and metal UV ink formulations with out ink build-up.
- Engineered to hold up to the rigors of non porous substrates, such as synthetics, foils and metals.

The CONTI-AIR® patented compressible layer with closed positive pressured cells provide. Smooth streak free solids, with industry leading gauge stability and smash resistance.

* EPDM based blankets are not recommended for conventional oil base inks or washes.
