PRISCO® LOW VOC ROLLER AND BLANKET WASH SERIES

Product Description: Prisco is proud to introduce our new technology for reducing VOC levels in the pressroom with products for blanket and roller washing. These new products have a high cleaning ability without the greasy-oily residue usually associated with reduced VOC products. This results in easier and more complete clean-up for minimum press down-time and improved print quality. Our low VOC washes are based upon our highly successful and proven wash products.

Advantages:

- High strength for rapid cleaning
- Easy to apply formula - glides onto rubber surfaces
- Water-miscible products de-lint and de-glaze during ink removal
- Increases ink receptivity
- Prolongs blanket and roller life

Applications:

- Sheetfed, manual or automatic wash systems

* For use with Elettra and Baldwin automatic wash system

Directions:

1. For rollers, apply the PRISCO wash to roller train. Set wash-up blade and apply additional amount to flush ink residues from train. Reapply as needed. For water miscible formulas a water wash may be used to de-lint and de-glaze rollers.
2. For blankets, apply the PRISCO wash to a rag and wipe surface of blanket until clean. If the wash is water miscible, simply apply a small amount of water to the rag. This will enable the rag to glide even more easily over the blanket surface while de-linting and de-glazing the blanket.

DO NOT APPLY WHILE THE PRESS IS IN MOTION.
