

Priscolith® newsprint

The Priscolith Newsprint, as the name implies, is specifically manufactured for newspaper presses. This “no-pack” blanket is available in gauges ranging from .082” to .088”. The Newsprint achieves a neutral feed due to a special construction of the compressible layer and new face compound. The Newsprint offers a quick release surface, improved print quality, resistance to sinking and long life on press. Prisco supports this blanket in the field with its technical team.

Features:

- Rough grind for quick release
- Stable carcass
- Neutral feed
- Advanced technology compressible layer
- Ability to handle many stocks
- Reduced piling and linting
- Washes easily
- Defect free and solvent resistant surface

Benefits:

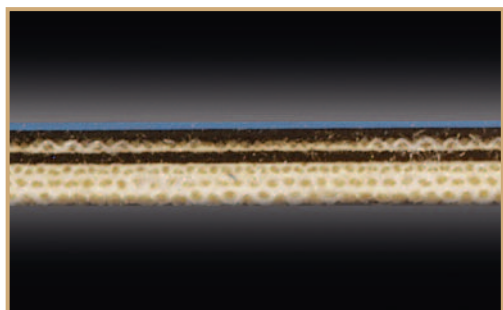

- Supberb release characteristics
- Precise printability
- Smash resistant
- Enhanced ink transfer increases print quality
- Preserves consistant web tension
- Minimum gauge loss

Durability:

- Minimal swelling and embossing
- Low stretch
- High compressibility
- Longer life

Physical Characteristics:

- | | |
|--------------------------|--|
| • Color: | Blue |
| • Buffed Surface: | Ver. 1: .083 +/-0.0008
Ver. 2: .087 +/-0.0008 |
| • Elongation @ 22.5 kgf: | Ver. 1: 1.3%
Ver. 2: 1.3% |
| • Hardness: | 78 Shore A |
