

# Priscolith<sup>®</sup> *deep purple*

The Priscolith DEEP PURPLE is specifically designed to run on Didde presses that require a 2-ply blanket. Unlike its competitors, the DEEP PURPLE is manufactured utilizing a compressible layer and ground and buffed surface layer. These advantages allow the DEEP PURPLE to withstand the rigors of printing on offset stock while providing satisfying solids and halftones.

## Physical Characteristics:

- |                          |                      |
|--------------------------|----------------------|
| • Color:                 | Purple               |
| • Buffed Surface:        | 2 Ply .052 +/-0.0008 |
| • Elongation @ 22.5 kgf: | 2 Ply 1.5%           |
| • Hardness:              | 80 Shore A           |
