PRISCO® Webfount™ Series Fountain Solution Concentrates

PRISCO® Webfount™ Fountain Solution Concentrates are one-step alcohol-eliminating solutions designed for use on web offset presses. The products have been formulated to increase press operating latitude with today's printing substrates and ink formulations. Printing plants will see significant measurable increases in productivity due to faster makeready times and reduced unplanned spoilage. In addition, our customers have seen overall quality improvements in their runs after switching to Webfount formulas. All formulas have broad buffering capabilities making them suitable for most water conditions. The products are organized into groups as follows:

Webfount 100 Series - A series of products for web presses with brush and spray dampening systems.

Webfount 200 Series - Products formulated for high-speed web press configurations including the latest gapless technologies.

Webfount 500 Series - Cost effective products for all types of dampening systems.

Series Advantages:

- Controls calcium related problems - prevents roller stripping
- Lower dot gain, sharper printing
- Minimizes paper piling - less down-time, more productivity
- Prevents plate blinding, toning and picture framing
- Effectively eliminates fungus growth - cleaner recirculators
- All products listed with the exception of Webfount 260E are compatible with catalytic convertors
