

PRISCO® 3451 Fountain Concentrate

Product Description:

PRISCO 3451 Fountain Solution Concentrate is designed for use on sheetfed presses. PRISCO 3451 may be used as a one-step solution on conventionally dampened press. The product may be combined with alcohol or with an Alkaless alcohol substitute to reduce or eliminate alcohol on continuously dampened presses.

Advantages:

- Prevents plate blinding and picture framing
- Buffered for use in low and medium alkalinity water
- Contains no phosphates
- Effectively eliminates fungus growth

Directions:

Use 2 to 4 ounces (1.5-3%) of PRISCO 3451 in each gallon of water. The pH will be approximately 4.0-4.5. Once optimum level has been determined, measure conductivity for use as a reference when preparing fresh batches of press-ready fountain solution.
