

## PRISCO® H-8 Series One-Step Fountain Concentrates

### Product Description:

PRISCO H-8 Series Fountain Solution Concentrates are “all purpose” one-step formulas designed for alcohol-free use on sheet-fed and heat-set web presses equipped with brush and continuous dampening systems. With their broad buffering capabilities they are suitable for most water types. The H-8 Series products are formulated to have the wide operating latitude required on today’s demanding high-speed presses. H8P, H8P Plus and H8L are recommended for use with energy-curable web and sheetfed inks.

### Family Advantages:

- Eliminates the need for alcohol and alcohol substitutes
- All versions are highly buffered for use in all water types except highly alkaline
- Designed to run without plate sensitivity, toning and scumming
- Eliminates feedback on Duotrol or Dahlgren dampening systems
- Prevents fungus growth
- Controls calcium related problems such as roller stripping and plate blinding

### Specific Advantages:

- H-8D, H-8P and H-8PLC3 contain non-piling ingredients to prevent piling and linting on blankets, and can reduce the need for frequent blanket washing.
- H-8P Plus contains extra non-piling ingredients, making it a great fountain solution choice for press runs with uncoated or super-calendered paper.
- H-8D is the standard formula and is designed for safe use with catalytic converters.
- H-8DE is a higher pH version.
- H-8L is designed for web and sheetfed presses using radiation curing ink.

### Directions:

Use 4 to 7 ounces (3-5%) of your chosen H-8 Series concentrate per gallon of water. After determining optimum dosage, measure conductivity for reference when making additional batches.

### Product Codes:

### READ SDS BEFORE USING THIS PRODUCT

H-8D -CodeH536; H-8P -CodeH518; H-8P Plus -CodeH516; H-8DE -CodeH513; H-8L -Code H498; H-8PLC3 -Code H468

### Packaging:

5-Gallon cube, 30-Gallon drum, 55-Gallon drum (use plastic pumps with drums) and 275-Gallon tote.
