PRISCO® 142-126 Fountain Solution Concentrate

Product Description: PRISCO 142-126 is one-step fountain concentrate specifically designed for use with silver photo-direct paper and polyester plates on sheetfed or web offset presses with continuous dampening systems. The formula contains silica which binds to the gelatin non-image area to more easily achieve water-ink balance. The formula is also compatible with most metal plates, eliminating the need to change fountain solutions for different plate types. PRISCO 142-126 is formulated to run in all water conditions.

Advantages:

- Can be used with silver photo-direct plates and conventional metal plates
- Formula prevents toning, scumming and tinting
- No additional additives needed when running photo-direct silver image plates
- Buffered for use in all water conditions

VOC: 2.16 lb/gal (0.26 kg/l)

Directions: Add 5 - 8 oz (3.8 - 6%) of Prisco 142-126 per gallon of water to obtain a freshly mixed pH in the 4.0 to 4.5 range. Once the optimum dosage has been determined, measure conductivity for use as a reference when preparing fresh batches of press-ready fountain solution.

Product Code: HC89

READ MSDS BEFORE USING THIS PRODUCT

Packaging	1-Gallon (3.785 Liter) plastic bottle	55-Gallon (208 Liter) drum
	5-Gallon (18.9 Liter) cube	275-Gallon (1041 Liter) tote
	30-Gallon (113.6 Liter) drum	5 Liter, 200 Liter

Note: Plastic pumps are required and are available for 30 and 55-gallon and 200 Liter drums.
