26 Blanchard Street
Newark, NJ 07105

Dear Ed,

Based on your emailed compatibility testing report of May 12, 2008, Baldwin is releasing the Autowash 2800 as chemically compatible with the components of a Baldwin/Oxy-Dry brush system.

If the Autowash 2800 is used on a Heatset press with a dryer the normal safety protocol of LEL testing and necessary adjustments to ensure wash quality will need to be made.

Best regards,

A handwritten signature in black ink, appearing to read "Ken Giesen".
