

Prisco®

PRODUCT INFO

PRISCO® CRYSTAL CLEAR

Product Description: Prisco Crystal Clear is a user friendly product for removal of calcium carbonate as well as other salt build-ups and glazes on press rollers. This low-acid product will keep rollers cleaner, prevent roller stripping and promote more consistent color when used regularly. Crystal Clear is non-corrosive to press components.

PRISCO Crystal Clear is intended for deep cleaning when there is a visible calcium build-up as a part of a three-step roller maintenance program.

Advantages:

- Prevents calcium salt build-up and roller glazing with regular use
- No offensive odor
- Far more effective than vinegar
- Non-Corrosive
- Low environmental impact - 0 VOC
- Lower health risk than competitive products

Directions: To use **PRISCO Crystal Clear**, first remove ink from the rollers using a **PRISCO** blanket and roller wash (a non water-miscible wash is preferred). Disengage the wash-up blade and apply **PRISCO Crystal Clear** to the rollers. Let the solution run-in for 3-5 minutes at wash-up speed. If necessary a small additional amount may be applied to prevent the rollers from drying out. Engage the wash-up blade and rinse rollers with warm water. With the wash-up blade still engaged rinse rollers with blanket and roller wash.

Product Code: HF15
