

The ALLIANCE ADVANTAGE Curriculum

Fountain Solution: An informative look at the make-up of modern fountain solutions. Areas covered include: conductivity and why it is important, how pH affects press performance, the similarities and differences between the three groups of fountain solutions, learning when to change fountain solution, a look at alcohol substitutes and a fountain solution troubleshooting guide.

Makeready Efficiency: During this seminar, participants are given the opportunity to either learn or enhance their brainstorming skills. Guided by the leader, your press crew(s) will develop ways to increase their efficiencies during the makeready process. This seminar provides a wonderful opportunity to have your people working together toward a common goal.

Roller Maintenance: This seminar addresses roller “housekeeping” issues that have a dramatic impact on print quality. The first section deals with the importance of regular ink and water roller maintenance. The material is presented with an emphasis on audience participation. This sets the stage for the second section, which takes place in the pressroom. Here we apply the knowledge to actual pressroom conditions.

Blanket Seminar: An interactive session that concentrates on the importance of maintaining accurate blanket, plate and back cylinder pressure. Reviewed are the correct ways to determine if your pressures are correct as well as the tools needed to perform these measurements. Included is an informative section on the construction of different types of blankets and product recommendations for various applications.

Aqueous & UV Coating: We have two seminars specific to Aqueous and UV coating that provide valuable information on how coatings are made, basic troubleshooting tips, recommended maintenance and product selection. The information presented in both seminars will greatly benefit all personnel who are involved with coating.
