

A new tote distribution system is now available through PriscoTech. The materials used in manufacturing this piece of equipment will allow for its potential use in storing, distributing and mixing a wide range of products.

Features

- Tubular steel construction
- Durable 1" teflon diaphragm pump
- Built in variable speed agitator
- Spring loaded shut-off valve
- Quick disconnects

Benefits

- Green Friendly - no more fiber drums to landfill
- Saves time - no more rotating of drums
- Saves space - more warehouse floor space
- Reduces waste - no product left in drums
- Consistency - mixes product continuously

Potential Uses

- AQ Coating
- UV coating
- Fountain Solution mixing station
- Water-based Adhesives
- Silicone distribution

Physical Characteristics

Height:	128"
Width:	54"
Depth:	50"
