

Use chemical resistant gloves classified under Standard EN374: Protective gloves against chemicals and micro-organisms. The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier. For further advice on glove selection, see [HSE Leaflet INDG330](#).

Product Code & Product Name	Glove materials recommended	Examples of glove types that may be suitable*
