

PRISCO® AQUEOUS COATING CLEANER

Product Description:

Aqueous coatings can enhance the appearance of printed materials, protect the printed surface, and provide faster handling. However, when aqueous coatings dry and harden on press, they are tough to remove. **Prisco Aqueous Coating Cleaner** is a non-ammonia formula designed to clean dried-on aqueous coating.

Advantages:

- Removes dried-on aqueous coating from coating blankets, rollers, and metal press parts
- Highly concentrated formula
- Less irritating to nasal passages than ammonia
- Non-flammable

Directions:

On rollers and press parts, apply **Prisco Aqueous Coating Cleaner** full strength to affected areas with a clean damp cloth or sponge. Rinse with water. When used on blankets, simply apply with sponge then wipe off excess. Use blanket wash if needed. Repeat as necessary.

Product Code: C521
