PRISCO® FLEX WASH

Product Description:

PRISCO FLEX WASH is designed to enhance the appearance of printed materials, protect the printed surface, and provide faster handling. It was specifically designed to clean water-based Flexo inks and uncured Flexo UV inks. It is also effective at removing aqueous coatings, with the added benefit of being a non-ammonia formula.

Advantages:

- Removes dried-on aqueous coating from coating blankets, rollers, and metal press parts
- Highly concentrated formula
- Less irritating to nasal passages than ammonia
- Non-flammable

Directions:

This product is designed to be used at 100% strength by applying it directly to the plate with a wipe or sponge. Wash off immediately after application. **DO NOT** allow PRISCO FLEX WASH to dry on plate. On rollers and press parts, apply **PRISCO FLEX WASH** at full strength to affected areas with a clean damp cloth or sponge. Rinse with water. When used on blankets, simply apply with sponge then wipe off excess. Use blanket wash if needed. Repeat as necessary.

Product Code: FL20

READ SDS BEFORE USING THIS PRODUCT

Packaging:
