

## SES 2626

**Product Description:** A 26% emulsion formulated specifically for heatset web offset printing applications.

### Advantages:

- Low cost formula
- Easy to use emulsion
- Contains an effective antistat additive
- Rich and creamy aesthetic
- Forms heat stable film after drying
- Excellent dilution stability
- Alkylphenol-free
- Reduces ink marking, smearing and marring
- Low surface tension provides good application roll wetting and web remoistening
- Improves gloss of printed materials
- Contains rust inhibitors

### Typical Properties

Appearance.....white liquid  
Specific gravity @ 70 °F.....~1.0  
pH.....~8

### Directions:

SES 2626 is designed to optimize heatset web offset printing operations. SES 2626 should be diluted with water before use. This product contains an effective antistat to control static charge during and after printing. The optimum SES 2626 dosage will be a function of printing conditions, including press speed, paper type, temperature and humidity. Start evaluations at 12 ounces of SES 2626 per gallon of water, adjust as needed to achieve desired performance and cost.

### Storage and Shelf Life:

SES 2626 has a shelf life of 12 months from the date of manufacture when stored between 35 and 104 °F in the original unopened container. Product may separate slightly after freezing and thawing. This form of separation is reversible, simply mix to recover the material.

### Safe Handling Information:

This information is only intended as a guide to the precautionary handling of this product by an appropriately trained person. All users should review the information contained on the product label and in the relevant Safety Data Sheet (SDS) before handling or using this product. Contact Prisco for a current SDS.
